### Abstract

 [View references \(24\)](#)

Bats are the only mammals capable of sustained flight and are notorious reservoir hosts for some of the world's most highly pathogenic viruses, including Nipah, Hendra, Ebola, and severe acute respiratory syndrome (SARS). To identify genetic changes associated with the development of bat-specific traits, we performed whole-genome sequencing and comparative analyses of two distantly related species, fruit bat *Pteropus alecto* and insectivorous bat *Myotis davidii*. We discovered an unexpected concentration of positively selected genes in the DNA damage checkpoint and nuclear factor κB pathways that may be related to the origin of flight, as well as expansion and contraction of important gene families. Comparison of bat genomes with other mammalian species has provided new insights into bat biology and evolution.

**Abstract:**

This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last.fm" (www.last.fm), can be applied to research, which potential it could have in the world of research (e.g. an open and interdisciplinary database, usage-based reputation metrics, and collaborative filtering) and which challenges such a model would face in academia. A real-world application of these principles, "Mendeley" (www.mendeley.com), will be demoed at the IE...

# Web Importer

## сохранение данных в процессе работы с веб-страницами

### How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

Can't see your Bookmarks Bar?

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

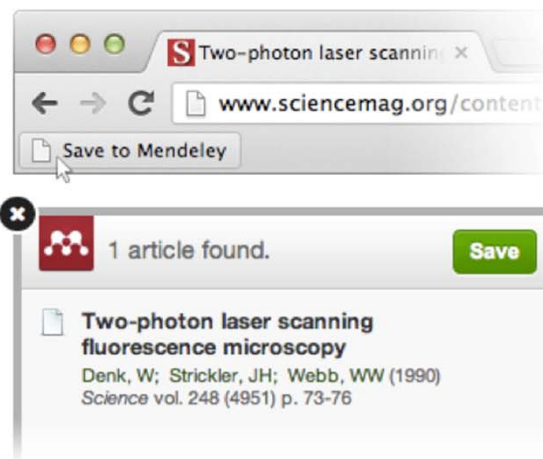

3. Click the "Save to Mendeley" bookmark

Click the "Save to Mendeley" bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

## Пример использования Web Importer

Click 'Save to Mendeley' to import references from your search results

The screenshot shows a web browser window with a Google Scholar search for 'Mendeley'. The search results are displayed on the left, and a 'Web Importer' overlay is shown on the right. The overlay displays a list of 10 articles found, with a 'Save all' button. The first article is 'Mendeley-A Last. fm For Research?' by Henning, V; Reichelt, J (2008). The second article is 'Generic assignments, strain histories and properties of pure cultures of cyanobacteria' by Rippka, R; Deruelles, J (1979). The third article is 'International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin)' by Hoyer, D; Clarke, DE; Fozard, JR (1994). The fourth article is 'The membrane actions of anesthetics and tranquilizers' by Seeman, P (1972). A grey arrow points to the 'Save to Mendeley' button in the browser's address bar, and another grey arrow points to the 'Save all' button in the Web Importer overlay.

Select an article and import the reference to your library in one click.

# Scopus и Science Direct

The screenshot shows the ScienceDirect search results interface. At the top, the ScienceDirect logo is on the left, and 'Remote' is on the right. Below the logo are tabs for 'Journals' and 'Books'. A search bar contains 'open access', and other filters for 'Author name', 'Journal or book title', 'Volume', 'Issue', and 'Page' are visible. An 'Advanced search' button is on the right. A green banner below the search bar states '440,137 articles found for: ALL(open access)' and includes links for 'See image results', 'Save this search', 'Save as search alert', and 'RSS Feed'. On the right side, there is a 'Go to page: 1 of 17606' and 'Next >' button.

On the left side, there are two panels: 'Search within results' with a search input and 'Refine results' with 'Limit to' and 'Exclude' buttons. Below 'Refine results' are filters for 'Publication' (Journal, Book, Reference Work) and 'Journal/Book Title' (The Lancet, Social Science & Medicine).

The main content area shows a list of search results. The second result is selected (checkbox checked): '7 - Looking ahead to... Demystifying the Institut... Marianne A. Buehler'. An 'Export' dialog box is open over this result, displaying the message 'You have selected 1 citation for export.' The dialog offers 'Direct export' options: 'Save to Mendeley' and 'Save to RefWorks', each with an 'About' link. It also offers 'Export file' options: 'RIS (for EndNote, Reference Manager, ProCite)', 'BibTeX', and 'Text', with an 'Export' button at the bottom.

Decorative chemical structures are visible in the bottom right corner of the page.

Perspective

## Why Full Open Access Matters

**Michael W. Carroll\***  
American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional, is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

**Why Support the Open-Access Financial Model?**

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The tradi-

their demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

Journal: *College & Research Libraries*

Year: 2012

Volume: 73

Issue:

Pages: 182-195

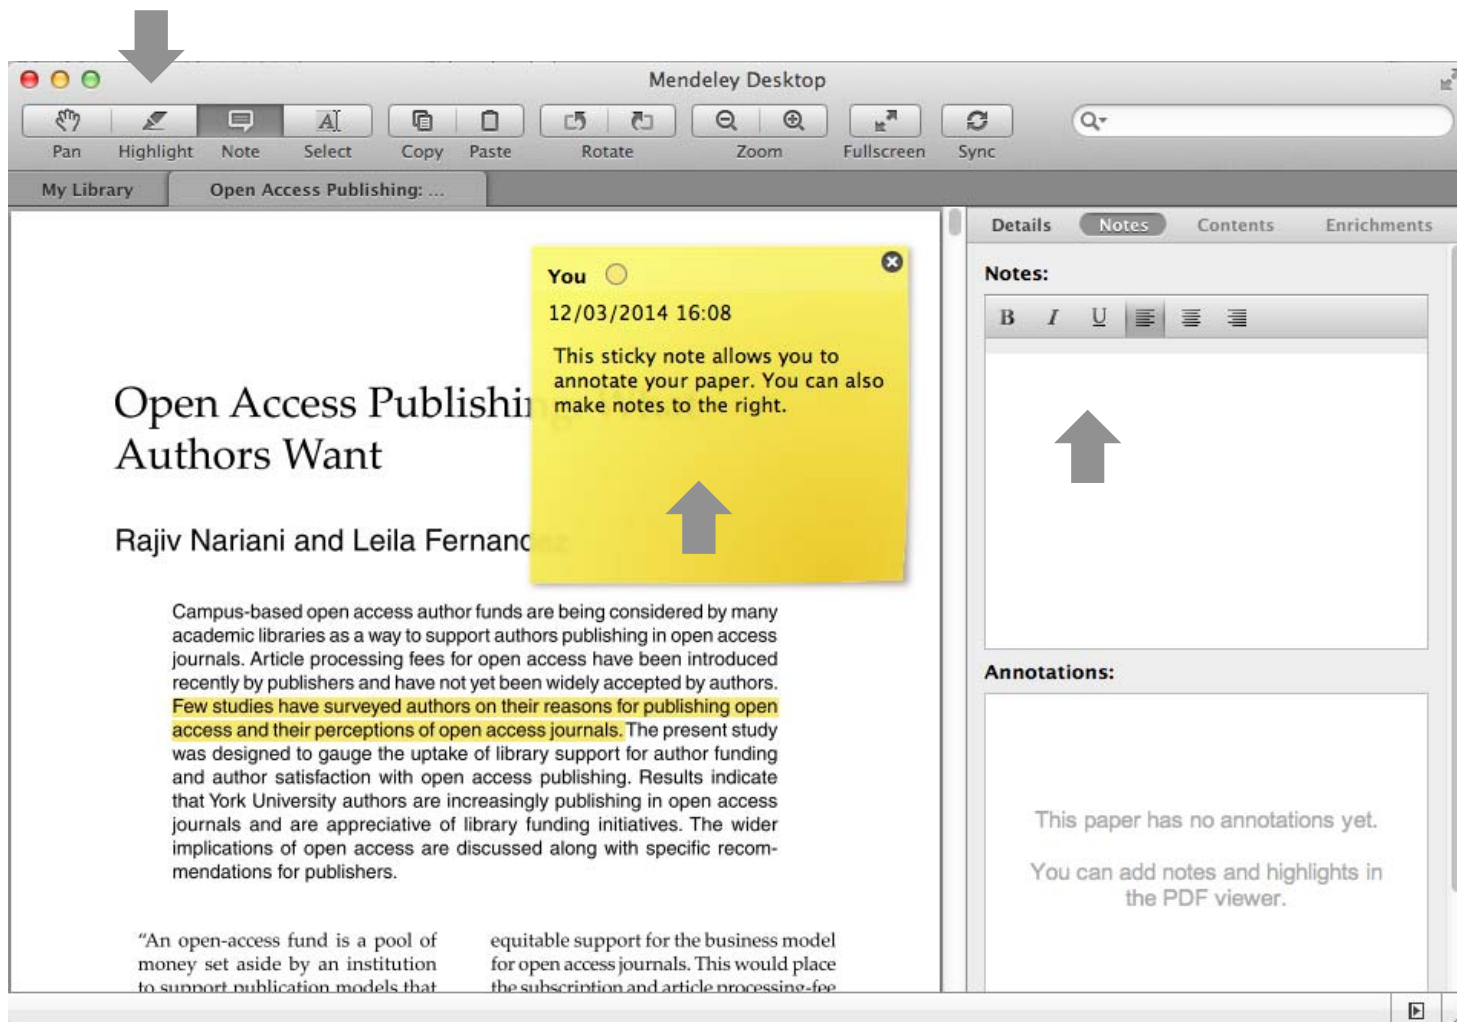

**Abstract:**

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

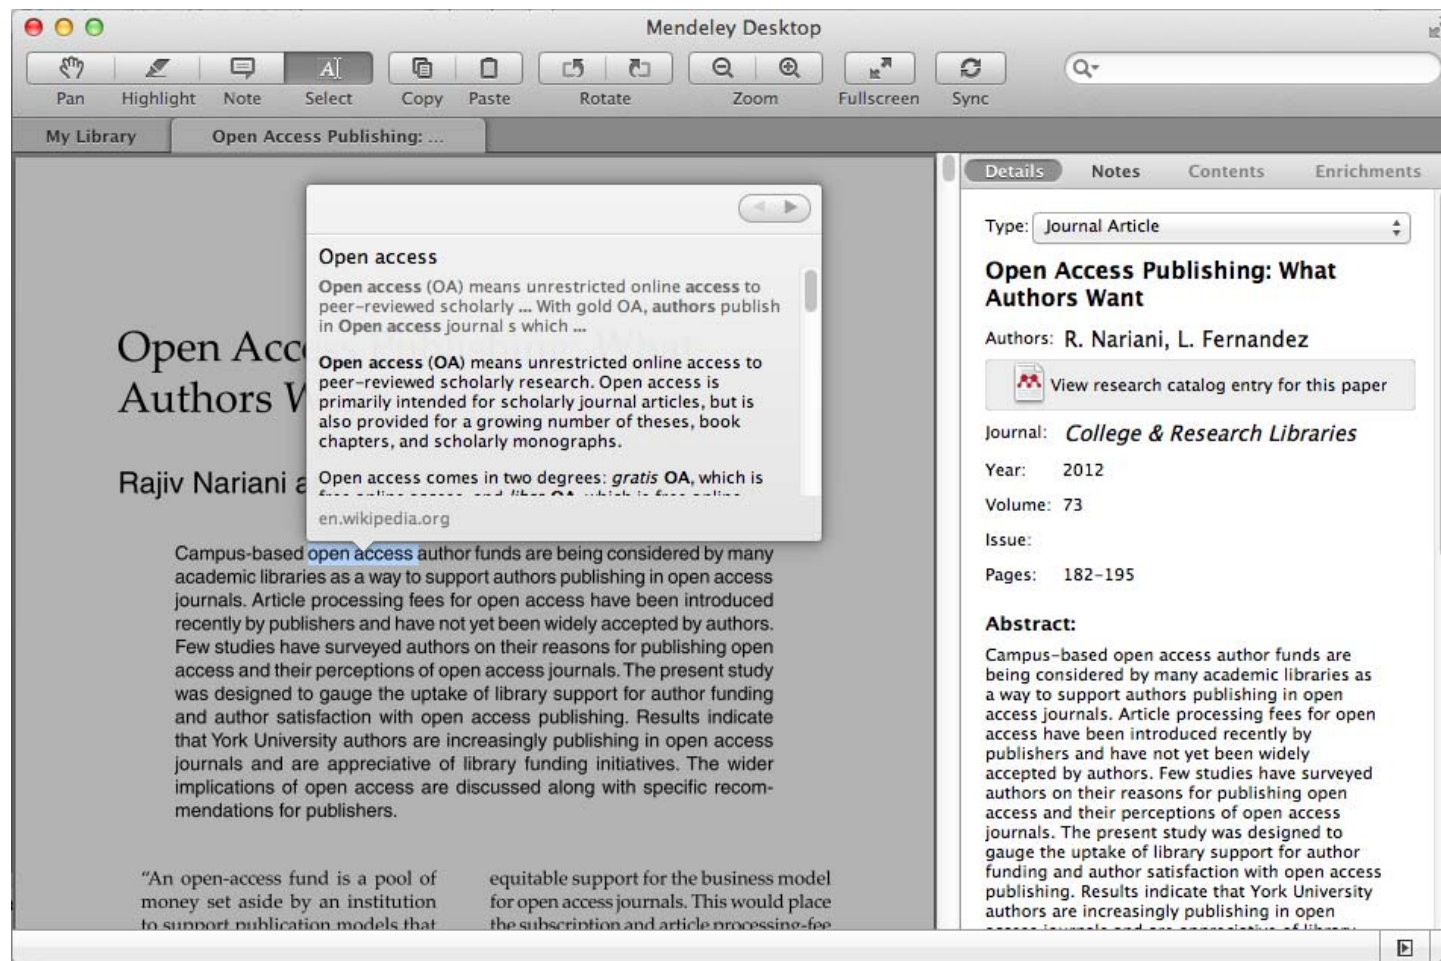

"An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing-fee

# Поиск CSL Style

База данных Mendeley содержит более 6700 стилей

# Редактор стилей

## 1. Find a style

### Search by name

If you're looking for a style like APA, Harvard, etc... just use the search box at the top of the page to search for a style name, or journal title.

### Search by example

If you don't know the name of the style, but know what the final citation should look like, you can use our [search by example](#) tool to find styles that most closely match.

## 2. Edit the style

If you can't find a style that quite suits your needs, find one that's a pretty close match and click the "Edit style" button to open that style in the [visual editor](#).

## 3. Use the style

Once you've found a style that's suitable for you to use, simply click the "Install" button on the search results, or "Save" a style you've edited, to use it in your reference manager.

Useful Links

# Редактор стилей

The screenshot shows the Visual CSL Editor interface in a browser window. The address bar shows the URL `editor.citationstyles.org/visualEditor/`. The page title is "Visual CSL Editor".

Navigation tabs include "About", "Search by name", "Search by example", "Visual editor" (selected), and "Code editor". A "feedback" button is visible on the right.

The current style is "American Psychological Association 6th edition".

On the left sidebar, there are sections for "STYLE INFO", "INLINE CITATIONS", "BIBLIOGRAPHY", "MACROS", and "ADVANCED". The "MACROS" section lists various macros such as "Macro: container-contributors", "Macro: secondary-contributors", "Macro: author", "Macro: author-short", "Macro: access", "Macro: title", "Macro: publisher", "Macro: event", "Macro: issued", "Macro: issued-sort", "Macro: issued-year", "Macro: edition", "Macro: locators", "Macro: citation-locator", "Macro: container", and "Macro: container-title".

The main content area displays "EXAMPLE CITATIONS" and "EXAMPLE BIBLIOGRAPHY".

Under "EXAMPLE CITATIONS", there are two examples:
 

- (Accadia et al., 2012)
- (McInnis & Nelson, 2011)

Under "EXAMPLE BIBLIOGRAPHY", there are two entries:
 

- Accadia, T., Acernese, F., Alshourbagy, M., Amico, P., Antonucci, F., Aoudia, S., ... Astone, P. (2012). Virgo: a laser interferometer to detect gravitational waves. *Journal of Instrumentation*, 7(03), P03012–P03012. doi:10.1088/1748-0221/7/03/P03012
- McInnis, M. D., & Nelson, L. P. (2011). *Shaping the body politic: Art and political formation in early america*. Charlottesville, VA: University of Virginia Press.

Below the examples is an "Info" section with a form for editing style details:

- Title: American Psychological Association 6th edition
- Title (short): APA
- ID: <http://www.zotero.org/styles/apa>
- Summary: (empty field)
- Rights: This work is licensed under a Creative Commons Attribution-ShareAlike 3.0 license
- Published: (empty field)
- ISSN: (empty field)
- eISSN: (empty field)

At the bottom, there is an "ISSNs" section with an "Add ISSN" button.

Biological Sciences ▾

### Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according the ...

Received 5 June 2007; received in revised form 4 October 2007; accepted 8 October 2007

### Abstract

**Objective:** "Pick-Klop" is a game based on cognitive behavioral therapy. It aims to change smokers' attitudes towards tobacco addiction. This study tests the feasibility and the impact of one brief session of the intervention in a naturalistic setting within a psychiatric hospital.

**Method:** Fifty-one smokers were recruited during their stay in a psychiatric hospital with a prohibitive smoking policy. They were assessed pre- and post-treatment with visual analogue scales designed to evaluate their intention to stop smoking.

**Results:** All patients completed the intervention. The outcome shows that the intention to stop smoking becomes significantly stronger after the intervention.

**Conclusion:** This pilot study supports the feasibility and the effectiveness of the "Pick-Klop" game in a psychiatric hospital setting. The game seems to improve the intention to quit smoking. The data, however, should be confirmed by a controlled trial. Moreover, follow-up studies are needed to examine the potential impact of the game on smoking cessation attempts.

**Practical implications:** The game seems to be a useful and simple tool for education about smoking in a psychiatric hospital setting.

### 1. Introduction

Smoking is the first avoidable cause of morbidity and mortality [1]. Most smoking cessation attempts are made without any help [2].

Despite the efficacy of nicotine substitutes [3], bupropion [4] and some behavioral approaches [5], these treatments are used only by a minority of smokers [6,7]. This is probably due to the

sufficient to induce behavioral changes [9]. Positive attitudes towards giving up nicotine addiction, however, are linked to a greater willingness to stop smoking [10].

In the transtheoretical model of behavioral change, a re-evaluation of the advantages and disadvantages of nicotine addiction and cessation enable smokers to evolve within the motivational process [11].

The notion of "self-efficacy" [12] corresponds to the trust

## Создайте свой научный профиль

The screenshot shows the Mendeley user interface. At the top, there is a navigation bar with the Mendeley logo and the name 'MENDELEY'. The user is logged in as 'Claire van den Broek'. Below the navigation bar, there are tabs for 'Dashboard', 'My Library', 'Papers', 'Groups', and 'People'. The 'People' tab is selected, and a search bar shows 'jan reichelt'. The main content area displays the profile of 'Dr. Victor Henning'. The profile includes a profile picture, a bio stating 'Co-Founder/CEO, Mendeley & VP Strategy, Elsevier, Amsterdam, Netherlands', and a research field of 'Psychology - Cognition'. Below the bio, there are sections for 'Publications' and 'Public Groups'. The 'Publications' section lists several journal articles, including 'Giving the Expectancy-Value Model a Heart' and 'Revolution of the reference management tool and its huge potential power to scholarly communications'. The 'Public Groups' section lists groups that Victor is a member of and groups he is following.
